RE: Lt Series Board Level Cameras: Sony Pregius Gen3 Models - Product Roll-out Package

Lt Series Board Level Cameras: Sony Pregius Gen3 Models Roll-out Package

Versatile High Resolution USB3 Board Level Cameras targeted at Embedded Vision systems

Description

Teledyne Lumenera is pleased to introduce our next six Lt Series Board Level Cameras USB3 models spearheaded by the latest sensors from the Sony® Pregius™ Gen3 CMOS family, starting with the IMX432 - 1.7 megapixel, 9.0 μm pixel size, and with a 12-bit output. This new sensor also offers a very good dynamic range with a 100K e- full well capacity.

Other Sony Pregius Gen3 sensors available are the IMX430 (2.0M), 1632(H) x 1248 (V) and IMX428 (7.1M), 3216 (H) x 2208 (V) with both 4.5 μm pixel.

Lt Series Board Level Cameras uses the industry's latest leading sensors such as the Sony Starvis™ rolling shutter, Pregius Gen2 and Pregius Gen3 series of global shutter active pixel-type CMOS image sensors. Additional leading sensors are targeted like the Teledyne e2v Emerald series.

Compact and versatile with USB3 capability

The next six models based on the Sony Pregius are presented in this roll-out package.

Lt-M1610B

1608 (H) x 1104 (V) @ 96fps

9.0 x 9.0 μm pixel

Using the Sony IMX432 Monochrome

Lt-C1610B

1608 (H) x 1104 (V) @ 96 fps

9.0 x 9.0 μm pixel

Using the Sony IMX432 Color

Lt-M1630B

1632 (H) x 1248 (V) @ 86 fps

4.5 x 4.5 μm pixel

Using the Sony IMX430 Monochrome

Lt-C1630B

1632 (H) x 1248 (V) @ 86 fps

4.5 x 4.5 μm pixel

Using the Sony IMX430 Color

Lt-M3200B

3216 (H) x 2208 (V) @ 50 fps

4.5 x 4.5 μm pixel

Using the Sony IMX428 Monochrome

Lt-C3200B

3216 (H) x 2208 (V) @ 50 fps

4.5 x 4.5 μm pixel

Using the Sony IMX428 Color

Markets and Applications

It is expected that the Lt Series Board Level Cameras will do exceedingly well in the following applications due to their wide range of resolutions, relatively fast frame rates for USB3 Vision board-level cameras, and competitive pricing.

Aerial Imaging

Laser Beam Profiling

Automatic Quality Control

ITS / Traffic Enforcement

Agriculture

Electronics Manufacturing

Example of Applications for USB3 Cameras

Aerial Imaging

The fundamental concerns for imaging systems for aerial imaging is size, weight, and power restrictions (also known as SWaP). These limit the choice of cameras for vision system applications such as precision agriculture, aerial surveillance, photogrammetry, geospatial imaging, and aerial inspection.

ITS Imaging

The Lt Series Board Level Cameras have a high dynamic range without losing the detail required for outdoor applications like toll management, speed and red light enforcement, HOT lane enforcement, and parking validation access control.

Life Science Imaging

Teledyne Lumenera designed the cameras with feedback from the medical industry. One of the biggest challenges with implementing an imaging component to a medical device is that there are often limiting size requirements. Many medical companies need to choose the dimensions of their product in the planning phase which eliminates any camera that does not fit that criteria.

Software support

The Teledyne Lumenera Lt Series Board Level Cameras are compatible with the following software packages.

All the part numbers starting with LT-**L**xxx-xxxxNBL are compatible with the Teledyne Lumenera SDK below:

Operating System	Teledyne LUMENERA SDK
  Linux	 Lumenera Camera Software Development Kit (LINUX) v2.5
 Windows	 LuCam Software and Software Development Kit v6.8.4

A download link can be found below:

<https://www.lumenera.com/support/industrial-usb-ethernet/drivers-downloads.html>

The Teledyne Lumenera Lt Series BoardLevel Cameras with part numbers starting with LT-**U**xxx-xxxxNBL are compatible with a USB3 Vision compliant SDK:

Teledyne Imaging has USB3 Vision support within its popular Sopera Lt SDK (compatible to v 8.60) Contact your sales representative for information.

Features and Details

Models Specific Details

Supported Features	Board-level Camera Models		
	LT-M/C1630B	LT-M/C3200B	LT-M/C1610B
Maximum Frame Rate (full resolution)	86 fps	50 fps	96 fps
Resolution	1632 x 1248 (2.0M)	3216 x 2208 (7.1M)	1608 x 1104 (1.7M)
Sensor	IMX430	IMX428	IMX432
Pixel Size	4.5 μm x 4.5 μm		9.0 μm x 9.0 μm
Full Well charge	25k e- (max)		100k e- (max)
Shutter	Full frame electronic global shutter function		
Exposure Control	Internal - Programmable via the camera API External – based on trigger width		
Pixel Data Formats	Monochrome 8-bit / 12-bit (for Mono models) Bayer 8-bit / 12-bit (for Color models)		
Gain Control	In-Sensor Gain: 48dB range up to 24dB as analog gain in 0.1 dB steps (1x to 15x) from 24dB to 48dB as digital gain in 0.1 dB steps (from 16x to 250x)		
Black Offset Control	Yes (0 to 511 dn)		
Synchronization	Via External Trigger Signal		
Output Dynamic Range † ‡	73 dB		
Responsivity	see graphic below

Common Details

Camera Controls	
Exposure Modes	Programmable in increments of 1µs minimum (in µs) is 14 µs maximum is 76 Minutes Pulse controlled via Trigger pulse width.
Trigger Inputs	Opto-isolated, 33V to 24V typical, 20mA. Trigger delay supported
Strobe Outputs	Output opto-isolated
Features	
Image Buffer	128 MB of on-board memory
Color Enhancement support	Brightness, Contrast and Gamma features on Color models
Defective pixel replacement	Yes
I/O signals	1 Input Opto-isolated, 1 Output Opto-isolated and 2 TTL bidirectional I/O
Software Interface	
Software Compatibility	Lt-Uxxx-xxxx P/N for the UBS3 Vision v1.0 compliant Lt-Lxxx-xxxx P/N for the Lumenera SDK compliant
Mechanical Interface	
Camera (L x H x W)	17.1 mm x 40.4 mm x 40.4 mm (with no lens mount)
Mass	28 g (with no lens)
Input Power	via 9-pin connector, or Data connector through USB
Data connector	USB3 Micro-B
I/O connector	JST# SM09B-NSHSS-TB (mating part:JST # NSHR-09V-S)
Electrical Interface	
Input Voltage	+5 to +12 Volts DC (+/-10%) on Auxiliary connector Supports the Power Over USB standard.
Power Dissipation	~3.6W
USB Speed	USB 3.1 Gen 1 (5 Gbps)
Data and Control	USB 3.1 Gen 1
Environmental Conditions	
Operating Temperature	0°C to 50°C (Housing Temperature)
Operating Relative Humidity	10% to 70% non-condensing
Storage Temperature	-40°C to +80°C
Storage Relative Humidity	20% to 80% non-condensing

9-pin I/O Connector Details

- A single 9-pin connector (JST# SM09B-NSHSS-TB)) for all Lt Board-level Camera Series models functions as both I/O and an auxiliary DC power source. The following figure shows the pin number assignment.

c

I/O Mating Connector Sources

Teledyne Lumenera offer a cable assembly for the Lt Board-level Camera Series. Refer to the cable pn: La4000PAFL in the accessory list.

For users wishing to build their own custom I/O cabling, the following product information is provided to expedite your cable solutions.

MFG	Part #	Description	Data Sheet
JST	NSHR-09V-S	Discrete connector	http://www.jst-mfg.com/product/pdf/eng/eNSH.pdf

Website Product page

Teledyne Lumenera's website (www.lumenera.com) is your best resource for product information on the Lt Series Board Level Cameras. The newer models will be added soon. Please direct your customers to the website as well. Feedback on the website should be forwarded to lumenera.postmaster@teledyne.com.

Electronic Images

Images of Lt Series Board Level Cameras can be found at the following link on the Teledyne Lumenera website on launch date:

https://www.lumenera.com/media/wysiwyg/images/products/industrial/products/Lt_Series-Board-Level.png

Family Datasheet

Here is a direct link to the family datasheet for the Lt Series Board Level Cameras without going through the product web page.

The links will remain valid even if we must update / change the files.

https://www.lumenera.com/media/wysiwyg/resources/documents/datasheets/industrial/Board_Level_Cameras_Data_Sheet.pdf

Availability

Eng. Sample units available starting in October 2020 (with the BB added at the end of the P/N).

For **full Production** p/n, another SIU will soon be release with availability and pricing.
Note: the CS-mount version will be available when reaching the Full production status.

Pricing and Ordering Options

The list prices for the camera models based on the Pregius Gen3 are provided in the table below. Current lead time for cameras is 3 to 5 weeks.

Contact your sales representative for volumes greater than 5 units.
